

DREW BROWN

Anderson, IN • brown.drew.711@gmail.com • 843-870-2753

PROFESSIONAL SUMMARY

Results-driven Electrical and Automation Engineer with 12+ years of technical experience transitioning to software and data engineering. Recently completed BS in Computer Science (2025) and MS in Information Technology (2026). Proven track record improving process reliability and reducing downtime through automation and data-driven solutions. Strong foundation in Java, SQL, PHP, and JavaScript with experience in MongoDB, Python, and database design.

TECHNICAL SKILLS

- **Programming Languages:** Java, SQL, PHP, JavaScript, Python
- **Databases:** MongoDB, MySQL, MS Access, relational database design and optimization
- **Tools & Technologies:** Git, REST APIs, data analysis, process automation, ETL pipelines
- **Methodologies:** Agile development, continuous improvement, data-driven decision making, Six Sigma Green Belt

EDUCATION

Master of Science in Information Technology

University of the People • expected September 2026

Bachelor of Science in Computer Science

Indiana University • May 2025

PROFESSIONAL EXPERIENCE

Electrical and Automation Engineer

Nestlé USA, Anderson, IN • January 2021 – Present

- Designed and implemented automated solutions that improved process reliability and reduced production downtime by analyzing system performance data and identifying optimization opportunities
- Developed data collection and monitoring systems to track equipment performance metrics, enabling proactive maintenance scheduling and reducing waste
- Led cross-functional projects integrating control systems with data analytics platforms to provide real-time visibility into production KPIs
- Collaborated with operations teams to identify process improvement opportunities through data analysis and implemented automated solutions

Electronic and Controls Technician / Instrumentation Specialist

Nestlé USA, Anderson, IN • June 2013 – January 2021

- Maintained complex electrical and control systems, ensuring 24/7 operational availability for high-volume production facility
- Performed preventative and corrective maintenance on instrumentation and control systems, developing systematic troubleshooting methodologies
- Utilized data logging and analysis tools to diagnose equipment issues and optimize system performance
- Documented technical procedures and created knowledge base resources for equipment maintenance and troubleshooting

Work Center Supervisor and Lead Petty Officer

United States Navy, USS Dwight D. Eisenhower • 2005 – 2013

- Led 13-person technical team managing operations and maintenance of nuclear power plants and electrical distribution systems
- Directed preventative maintenance programs for 500+ critical equipment items, ensuring mission readiness and safety compliance
- Completed intensive nuclear power training, including 1,200+ hours of advanced mathematics, physics, and electrical theory
- **Security Clearance:** Secret (inactive)

CERTIFICATIONS & ADDITIONAL SKILLS

- Six Sigma Green Belt – Continuous Process Improvement
- Advanced written and intermediate conversational Spanish
- Microsoft Excel (advanced), technical documentation, data visualization
